EXPERIENCE

Irth Solutions - Software Developer II | Remote | July 2022 - Present

- Led **Azure DevOps projects** (CI/CD, Git, VM management) to speed up deployments and improve reliability.
- Built **full-stack solutions in C#/.NET (Webforms, MVC, Core, WinForms)**, modernizing legacy systems and delivering scalable APIs.
- Optimized **SQL Server databases** with advanced functions and procedures, reducing query times for high-volume operations.
- Developed **ETL/ELT pipelines** with SSIS, SSRS, and SSAS to enable actionable analytics. .
- Integrated **GIS tools (ESRI, NetTopologySuite)** to provide geospatial insights for business operations. .
- Worked in Agile/Scrum teams, improving SDLC efficiency and collaboration.
- Communicated effectively with stakeholders, creating clear documentation and driving solution adoption.

National Air Cargo Holdings - Software Developer | Orchard Park, NY | July 2018 - June 2022

- Built **ETL solutions and SSIS packages** to migrate and warehouse data, improving reliability and speed.
- Revamped **airline payroll system**, moving from Access to SQL Server 2016 and saving the company **hundreds of thousands annually**.
- Established **EDI standards** to meet service and operational agreements.
- Modernized legacy apps, upgrading from **Visual Studio 2005 to 2017**, reducing maintenance and extending lifecycle.
- Developed web applications in **.NET Webforms, MVC, and Core**, delivering scalable business solutions.
- Created **KPI dashboards and reporting tools**, giving executives real-time visibility into performance.
- Automated workflows with **PowerShell and Python**, reducing manual effort in scheduled processes.
- Utilized **Microsoft Azure (IaaS/PaaS, Synapse, DevOps, Active Directory)** to support scalable cloud infrastructure.

Enterprise Infrastructure Services - IT Consultant | Buffalo, NY | August 2015 - June 2018

- Supported **20,000+ end users** with desktop software, hardware, and troubleshooting.
- Managed **Active Directory requests, file/email restores, and enterprise system administration** to ensure business continuity.
- Handled **domain name requests (IPv4, IPv6, MAC addresses, canonical names)** to maintain network integrity.
- Authored clear **process documentation**, improving knowledge sharing and streamlining IT operations..

EDUCATION

University at Buffalo - B.ASc Computer Science and Engineering (2015 - 2018)
